# The Premium HDMI® Cable Certification Program

HDMI Licensing Administrator, Inc.

2026

HDMI®
HIGH-DEFINITION MULTIMEDIA INTERFACE

**The Premium High Speed HDMI® Cable**
supports 4K video with a rigorous compliance test specification
and certification requirement specifically designed to
enable cables to support 4K@60Hz performance while
eliminating interference from EMI emissions

**The Premium HDMI Cable Certification® Program**
assures consumers and commercial integrators that cables
are certified and also remain in compliance with an
authentication and verification process
throughout a product's lifecycle

HDMI®

# Supports 4K Content Distribution and Usage

- **Universal 4K/60 Adoption:** Almost 100% of new TVs are equipped with HDMI® technology specifically optimized for stable **4K@60Hz** performance

- **4K@60 as the Industry Benchmark:** Global 4K TV shipments have fully matured, establishing **4K@60Hz** as the dominant and expected screen resolution across all sectors

- Expanding 4K/60 Content Ecosystem

- Diverse High-Bandwidth Distribution

- **Reliable 4K/60 Installs:** High-performance installations are critical to eliminate signal dropouts and reduce costly returns/service calls.

# The Premium HDMI® Cable Certification Program

- Administered by the official **agent for the HDMI specifications**

- Requires **every length of every model** line to be tested

- Requires each cable to be tested at an official **HDMI Authorized Test Center**

- Requires authentication and verification via a unique individual QR code on each product.

- Requires **continuing compliance** with audit tests of in-market cables throughout the life of the product, and failing cables are removed from the label ordering system

- **Instant QR Verification:** Verify certified cables instantly via **QR code reader** to eliminate signal dropouts and reduce service costs.

HDMI®
HIGH-DEFINITION MULTIMEDIA INTERFACE

# The Premium Cable Compliance Test Specification

- Adds on to previous test specifications to ensure super-reliable connectivity for feature-rich 4K@60Hz/UltraHD content

- Tests are specifically designed to support 18Gbps uncompressed bandwidth

- Expanded tests replicate actual use of 4K@60Hz resolution and frame rates and ensures delivery of a full range of premium high speed feature set

- Additional EMI tests ensure no signal interference to wireless devices, important since ports are adjacent to Wi-Fi streaming plug-ins and other wireless devices

# Identifying Premium High Speed HDMI® Cables

**Premium High Speed HDMI® Cable**

with Ethernet

7m/23ft

**HDMI®**
